### **2020: ECONOMIC IMPACT ANALYSIS**

The report prepared under the ABEC in 2020 provides an analysis of the project's impact on the economies of both countries based on several potential alignments with a price range of US\$80 million to US\$600 million.

#### **Additional GDP growth:**

In the Republic of Kazakhstan - \$31 - \$ 95 million a year In the Kyrgyz Republic - \$ 53 - \$ 194 million a year "An important aspect of the economic development provided by the alternative road is the impact on employment. About half of the additional jobs in the Kyrgyz Republic and 25%–33% in Kazakhstan are in the hotel industry."

STRONGER

TOGETHER

#### 60% GDP growth due to direct benefits:

Additional tourists (international and regional) who can be attracted to Almaty and Issyk-Kul regions and as additional consumers. Additional investments in the tourism industry are driven by revenue growth.

#### 40% GDP growth due to indirect benefits:

Businesses are expected to buy more goods and services as their revenue increases. Due to a more integrated economy in the region: the tourism business in Issyk-Kul buys more goods from Kazakhstan, Almaty and the Almaty region will buy more agricultural goods from Kyrgyzstan.

### LEGAL FRAMEWORK

STRONGER

TOGETHER

- The Almaty-Issyk Kul alternative highway project is a cross-border project.
- The parties agreed that, in the event if the governments of the Republic of Kazakhstan and the Kyrgyz Republic decide to implement the project, it will be prepared and taken to the market in accordance with the requirements of the legal framework of the Republic of Kazakhstan.
- This decision was made taking into account the issues relating to the land alienation, more than 95% of the alternative road is located on the territory of the Republic of Kazakhstan, as well as the successful experience existing in Kazakhstan in the implementation highway projects using the public-private partnership (PPP) scheme, such as the Big Almaty Ring Road (BAKAD) which costed \$543 million during the construction period.
- Thus, the project will require the approval of the Jogorku Kenesh (Parliament) of the Kyrgyz Republic in accordance with the requirements of the existing legal framework of the Kyrgyz Republic.

### **TECHNICAL SCREENING**

# STRONGER TOGETHER

The technical consultant estimated the indicative cost of construction options US dollars in 2025. The operation of sections of 88.4 km and 49 km in the base scenario - from A-2 to the border - will be transferred to be managed by the concessionaire, in order to maintain the entire section in proper condition and attract a sufficient volume of traffic.
